

THE PAEDIATRIC TRAUMA COURSE THAT STARTS WHERE THE OTHER COURSES END

FOR INDIVIDUALS

**A COURSE FOR
PAEDIATRIC NURSES
AND AHPs ACROSS
THE TRAUMA SPECTRUM**

PCAR Programme Description

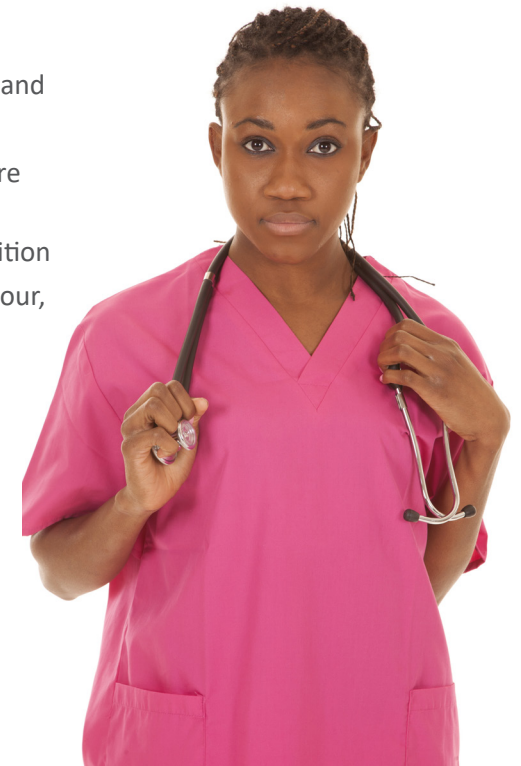

Unlike trauma programmes targeted at prehospital or emergency care providers, the Paediatric Trauma Care After Resuscitation (PCAR) course was explicitly designed for bedside professionals who care for injured kids in critical care, theatre, ward, and rehabilitation settings.

PCAR gives inpatient staff members the essential knowledge and clinical reasoning skills to address NMTNG competencies and provide excellent care to this challenging patient population.

Trauma Trained & Trauma Ready

Access top-notch trauma education in an entirely online, on-demand format, available whenever and wherever you are ready to learn.

- Each segment contains a professionally recorded video lecture with closed captioning and playback features
- Pre- and post-course tests document your knowledge acquisition
- Enrollment includes a FREE 180+ page downloadable, full-colour, pdf manual
- The bibliography contains over 2300 references
- A 1000+ word glossary defines key trauma terms
- The *Ask a Trauma Nurse* link lets you pose questions and receive expert feedback
- Course access is available for 1 year
- PCAR verification is current for 4 years

TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

- Fluid Management
- Delayed Injury Presentation
- Sepsis & Organ Failure
- Compartment Syndrome
- Mobilisation
- Rhabdomyolysis
- Pain Management
- Age-related issues
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
- Wound & Skin Care
- Non-Accidental Trauma
- Post-Traumatic Stress
- Organ & Tissue Donation

TCAR
EDUCATION PROGRAMS

OFFICE HOURS:

Monday – Friday: 3:00 pm – 1:00 am GMT

PCAR Programme Overview

PCAR is divided into 8 modules consisting of 75 bite-sized segments with over 700 interactions to reinforce learning. The PCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalised children and adolescents:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the injury-to-discharge care of children with trauma to specific body regions. Cases include the surgical, medical, and nursing management of kids with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma
