

# THE PAEDIATRIC TRAUMA COURSE THAT STARTS WHERE THE OTHER COURSES END

FOR ORGANISATIONS

**A COURSE FOR  
PAEDIATRIC NURSES  
AND AHPs ACROSS  
THE TRAUMA SPECTRUM**

## PCAR Programme Description

Unlike trauma programmes targeted at prehospital or emergency care providers, the Paediatric Care After Resuscitation (PCAR) course was explicitly designed for bedside professionals who care for injured kids in critical care, theatre, ward, and rehabilitation settings.

PCAR gives inpatient staff members the essential knowledge and clinical reasoning skills to address NMTNG competencies and provide excellent care to this challenging patient population.

## Trauma Trained & Trauma Ready

With PCAR online, education is available on demand, anytime, anywhere, in a self-contained, interactive format.

- Start training employees immediately
- Purchase 'seats' then assign them to learners for up to 2 years
- Reduce overall training costs, as compared to onsite courses
- Take advantage of substantial bulk discounts
- Eliminate classroom and contracting hassles
- Accommodate employees on all shifts
- Set deadlines, track progress, see test scores, and download certificates from your computer
- Automatically send progress reminders to your learners

Course enrollment includes a full-colour 180+ page, downloadable pdf manual. Learners have 1-year access to all course materials. PCAR verification is current for 4 years.

# TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

- Fluid Management
- Delayed Injury Presentation
- Sepsis & Organ Failure
- Compartment Syndrome
- Mobilisation
- Rhabdomyolysis
- Pain Management
- Age-related issues
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
- Wound & Skin Care
- Non-Accidental Trauma
- Post-Traumatic Stress
- Organ & Tissue Donation

## PCAR Programme Overview

PCAR is divided into 8 modules consisting of 74 bite-sized segments with over 700 interactions to reinforce learning. The PCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalised patients:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the injury-to-discharge care of children with trauma to specific body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma

## A COMPREHENSIVE TRAUMA COURSE DESIGNED TO SATISFY THE LEARNING NEEDS OF INPATIENT NURSES AND AHPs
