

FOR ORGANISATIONS

THE TRAUMA COURSE THAT STARTS WHERE THE OTHER COURSES END

A COURSE FOR NURSES &
AHPs ACROSS THE TRAUMA
SPECTRUM

TCAR Programme Description

Unlike trauma programmes targeted at prehospital or emergency care providers, the Trauma Care After Resuscitation (TCAR) course was explicitly designed for bedside professionals who care for injured patients in critical care, theatre, ward, and rehabilitation settings.

TCAR gives inpatient staff members the essential knowledge and clinical reasoning skills to address NMTNG competencies and provide excellent care to this challenging patient population.

Trauma Trained & Trauma Ready

With TCAR's online format, education is available on demand, anytime, anywhere, in a self-contained, interactive format.

- Start training employees immediately
- Purchase 'seats' then assign them to learners for up to 2 years
- Reduce overall training costs, as compared to onsite courses
- Take advantage of substantial bulk discounts
- Eliminate classroom and contracting hassles
- Accommodate employees on all shifts
- Set deadlines, track progress, see test scores, and download certificates from your computer
- Automatically send progress reminders to your learners

Course enrollment includes a full-colour, downloadable pdf manual. Learners have 1-year access to all course materials. TCAR verification is current for 4 years.

*Providing the cognitive content necessary to meet
National Major Trauma Nursing Group competencies.*

TRAUMA CARE DOESN'T END AT THE EMERGENCY DEPARTMENT. WHY SHOULD TRAUMA EDUCATION?

- Fluid Management
- Delayed Injury Presentation
- VTE Prophylaxis
- Sepsis & Organ Failure
- Compartment Syndrome
- Mobilisation
- Rhabdomyolysis
- Pain Management
- Geriatric & Bariatric Patients
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
- Wound & Skin Care
- Alcohol Withdrawal
- Post-Traumatic Stress
- Organ & Tissue Donation

TCAR Programme Overview

TCAR is divided into 8 modules consisting of multiple bite-sized segments with many interactions to reinforce learning. The TCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalised patients:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the injury-to-discharge care of patients with trauma to specific body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma
