

THE TRAUMA COURSE THAT STARTS WHERE THE OTHER COURSES END

FOR INDIVIDUALS

A COURSE FOR NURSES
ACROSS THE TRAUMA
SPECTRUM

TCAR Program Description

Unlike trauma programs targeted at prehospital or emergency care providers, the Trauma Care After Resuscitation (TCAR) course was explicitly designed for bedside professionals who care for trauma patients in critical care, perioperative, acute care, and rehabilitation settings.

TCAR gives inpatient staff members the essential knowledge and clinical reasoning skills to meet ACS and regulatory requirements and provide excellent care to this challenging patient population.

Trauma Trained & Trauma Ready

Access top-notch trauma education in an entirely online, on-demand format, available whenever and wherever you are ready to learn.

- Each segment contains a professionally recorded video lecture with closed captioning and playback features
- Pre- and post-course tests document your knowledge acquisition
- Enrollment includes a FREE 180+ page downloadable, full-color, pdf manual
- The bibliography contains over 2300 references
- A 1000+ word glossary defines key trauma terms
- The *Ask a Trauma Nurse* link lets you pose questions and receive expert feedback
- 350+ trauma-related competencies are included (listed by course segment)
- 18 NCPD hours are awarded for course completion
- Course access is available for 1 year
- TCAR verification is current for 4 years

TRAUMA CARE DOESN'T STOP AT THE ED DOORS. WHY SHOULD TRAUMA EDUCATION?

- Fluid Management
- Delayed Injury Presentation
- VTE Prophylaxis
- Sepsis & Organ Failure
- Compartment Syndrome
- Mobilization
- Rhabdomyolysis
- Pain Management
- Geriatric & Bariatric Patients
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
- Wound & Skin Care
- Alcohol Withdrawal
- Post-Traumatic Stress
- Organ & Tissue Donation

OFFICE HOURS:

Monday – Friday: 7:00 am – 5:00 pm US Pacific Time

TCAR Program Overview

TCAR is divided into 8 modules consisting of 74 bite-sized segments with over 700 interactions to reinforce learning. The TCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalized patients:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the injury-to-discharge care of patients with trauma to specific body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma
