

## FOR ORGANIZATIONS

# THE TRAUMA COURSE THAT STARTS WHERE THE OTHER COURSES END

## A COURSE FOR NURSES ACROSS THE TRAUMA SPECTRUM

### TCAR Program Description

Unlike trauma programs targeted at prehospital or emergency care providers, the Trauma Care After Resuscitation (TCAR) course was explicitly designed for bedside professionals who care for trauma patients in critical care, perioperative, acute care, and rehabilitation settings.

TCAR gives inpatient staff members the essential knowledge and clinical reasoning skills to meet ACS and regulatory agency requirements and provide excellent care to this challenging patient population.

### Trauma Trained & Trauma Ready

With TCAR online, education is available on demand, anytime, anywhere, in a self-contained, interactive format.

- Start training employees immediately
- Purchase “seats” then assign them to learners for up to 2 years
- Reduce overall training costs, as compared to onsite courses
- Take advantage of substantial bulk discounts
- Eliminate classroom and contracting hassles
- Accommodate employees on all shifts
- Set deadlines, track progress, see test scores, and download certificates from your computer
- Automatically send progress reminders to your learners
- TCAR verification is current for 4 years.

Course enrollment includes a full-color, downloadable pdf manual. Learners have 1-year access to all course materials.

# TRAUMA CARE DOESN'T END AT THE EMERGENCY ROOM. WHY SHOULD TRAUMA EDUCATION?

- Fluid Management
- Delayed Injury Presentation
- VTE Prophylaxis
- Sepsis & Organ Failure
- Compartment Syndrome
- Mobilization
- Rhabdomyolysis
- Pain Management
- Geriatric & Bariatric Patients
- Nutrition
- Intra-abdominal Hypertension
- Late Complications
- Wound & Skin Care
- Alcohol Withdrawal
- Post-Traumatic Stress
- Organ & Tissue Donation

EDUCATION PROGRAMS

OFFICE HOURS:

Monday – Friday: 7:00 am – 5:00 pm US Pacific Time

## TCAR Program Overview

TCAR is divided into 8 modules consisting of multiple bite-sized segments with many interactions to reinforce learning. The TCAR course begins by focusing on concepts relevant to the nursing care of all injured, hospitalized patients:

- The trauma care spectrum
- The biomechanics of trauma
- The body's response to injury

Learners practice applying these concepts as they progress through case scenarios that cover the injury-to-discharge care of patients with trauma to specific body regions. Cases include the surgical, medical, and nursing management of patients with:

- Thoracic trauma
- Abdominal trauma
- Musculoskeletal trauma
- Head trauma
- Spine & spinal cord trauma
